

## **Med Stop Before Surgery**

One week before surgery you need to stop:

- 1) Any blood thinner, such as Coumadin, Warfarin, Plavix, Xarelto, Pradaxa, Eliquis, Aspirin
- 2) Any anti-inflammatory medications, except Celebrex  
(examples are: Advil, Aleve, and Mobic)

You can continue to take the following medications:

- Tylenol products
- Celebrex
- Tramadol
- Multivitamins and supplements
